2025-2026 G2 Science Formative Assessment

Science in Action Project (Term 2)

Name:_____(_____) Mark:_____/10

Class: G.2_____ Date:_____

Guardian's Signature:_____

Due: Monday, 4th May, 2026

In this project, students will be assessed by giving examples of the key concepts and explaining using keywords from **Topic 3.4 Properties of materials** and **Topic 3.9 Changing materials** covered in the Science lesson to show their understanding.

There are many types of materials, and different materials have different properties.

There are two parts:

Part A: Give examples of (1) a physical change and (2) a chemical change. Take pictures of examples of a physical and a chemical change, print them and stick them onto the paper.

Students paste pictures of the examples in the spaces provided.

Part B: Identify the objects that should be used based on their properties. Circle the correct answers.

Important

In Part A, **1 mark** will be deducted for each question if pictures are drawn instead of printed. **2 marks** will be deducted **at most** for Part A.

Part A Application Questions (4 marks, @2 marks)

1. Paste a printed picture of a **physical change**.

2. Paste a printed picture of a **chemical change**.

/4

Part B Situational Questions (6 marks, @2 marks)

Circle the correct answers.

1. Lucy wants to sit comfortably on the chair.

a) Which object would she need:

Cushion

Lego bricks

Rock

b) Because this object is **(soft / heavy / rough)**.

2. Nathan wants to dry his body after taking a shower.

a) Which object would he need:

Aluminium foil

Towel

Zipper bag

b) Because this object is **(absorbent / hard / smooth)**.

3. Ben wants a container that can show how much water is left.

a) Which object would he need:

Metal bottle

Plastic bottle

Wooden box

b) Because this object is **(flexible / weak / transparent)**.
