

Science Demonstration Video Briefing Grade 3

What you need to do...

- Design a fun and interesting science experiment.
- Record your experiment.
- Upload your video onto Teams.

In your video, you must...

1. List all the materials.

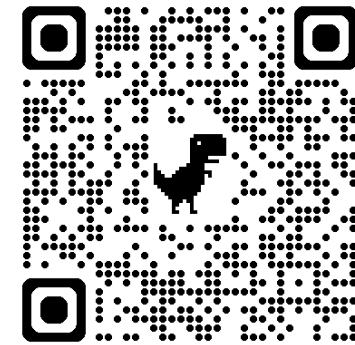

https://youtu.be/IS9eSZUb_vA7si=azSC7FT33apSOWut&t=18

"Here is the material we need."

Then lists:

Two clear cups (one with clear water and one empty)... Blue food coloring... Activated charcoal... A funnel... Filter paper... A spoon... A small plastic funnel..."

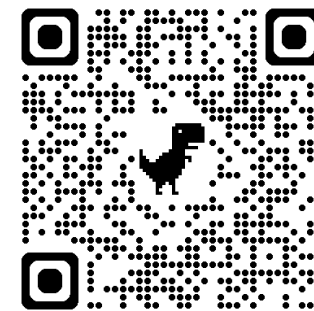

In your video, you must...

2. Go through all the steps.

- Uses sequencing words such as **"First"** and **"Next"**.
- Explains the setup and procedure step by step.
- Demonstrates what happens during the experiment.
- Describes the observation after completing the procedure.

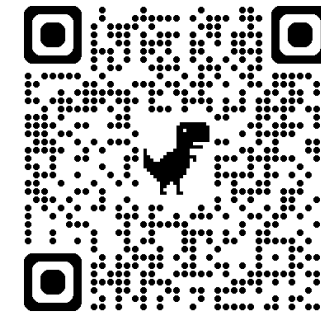

https://youtu.be/IS9eSZUb_vA?si=EY3icnWRqACZ1UDr&t=53

In your video, you must...

3. Describe your results or observations.

- Describes the change from **blue water to clearer water**.
- States what happened to the blue color.
- Explains how the charcoal helped filter the water.
- Connects the observation to the scientific concept.

https://youtu.be/IS9eSZUb_vA?si=mDAOUV6WpXt7VqFe&t=170

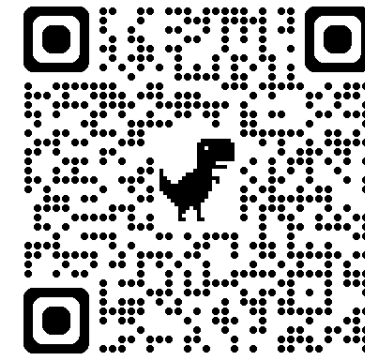

In your video, you must...

4. Explain the scientific theory. (Grade 3)

https://youtu.be/IS9eSZUb_vA?si=WJ4mXfdXv0dwwZ95&t=202

✓ **Explained:** The charcoal trapped the color particles in its tiny holes, allowing cleaner water to pass through.

Do not forget to...

Plan your video carefully!

1. Introduce yourself and your experiment.
2. List all the materials you need.
3. Go through all the steps in order.
4. Describe your results or observations.
5. Explain how your experiment works.
(Grade 3 only)

Do not forget to...

Communicate effectively!

- Speak loudly and clearly.
- Use correct body language and gestures.
- Smile and look into the camera.
- Show your experiment clearly.

And most importantly...

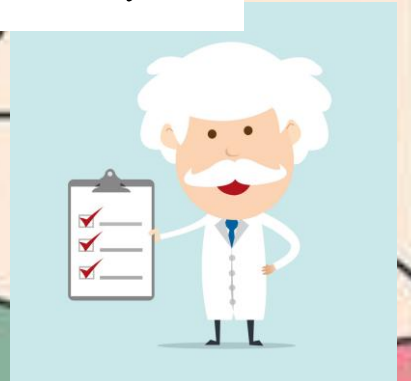

Be safe!

Grade 3

Marking criteria:

1. List out all the materials used for the experiment. (2 marks)
2. Go through all the steps of the experiment. (2 marks)
3. Describe the results or observations of the experiment. (2 marks)
4. Plan the experiment and video well. (1 mark)
5. Explain the scientific theory behind the experiment. (1 mark)
6. Communicate effectively to the audience in the video. (2 marks)

There will also be prizes for the best videos!

Most Creatively
Presented

Most
Interesting
Topic

Super Scientist

To do...

- Complete your Science Demonstration Video worksheet.
- Submit the worksheet to your Science teacher for feedback before you record your video.
- Record and upload your video onto Flip.

26-27 Term 1 Science G3 Science Demonstration Video Worksheet

Name: _____ () Class: _____ Date: _____

Due (WS): 25th Sept (Fri) ★ Worksheet: Optional ✓ Video: Must Do (Mandatory)

Step 1: **Before** recording your science demonstration video, complete the following steps to ensure you fulfill the requirements of the rubric.

Introduction:			1. Introduce your experiment:
			Today, I am going to show you...
Materials:			2. List your materials:
			I will need...
Steps:			3. List the steps using the following connectives:
			First...
			Next/then...
			Finally...

Submitting your video...

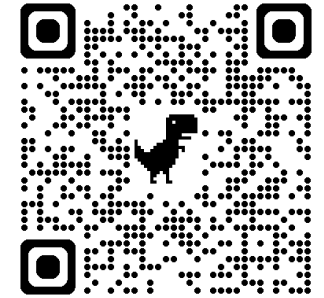

Submission Deadline:	Friday, 9 th October, 2026
Video Length and File Size:	No longer than 5 minutes
Submission Platform:	Teams Sci. H.W. Channel
